DETAILED ACTION***Election/Restrictions***

1. Applicant's election with traverse of group I in the reply filed on 30 December 2005 is acknowledged. The traversal is on the ground(s) that groups II-IV could be searched and examined together with the elected group since they are sufficiently related in technical subject matter to the elected group. This is not found persuasive because the claimed inventions are distinct for the following reason. The invention claimed in the linking claim 1 is determined to be not patentable as shown below, leaving claims joined thereby without a common inventive feature. Thus, inventions of groups I-III **as claimed** are distinct and separate inventions. For example, the invention of group I **as claimed** does not require the plurality of slots of group II **as claimed** for patentability as evidenced by the omission thereof from group I, and conversely, the invention of group II **as claimed** does not require the knife holder formed of elastomeric material of group I **as claimed** for patentability as evidenced by the omission thereof from group II. Furthermore, the invention of group IV can be practiced by another materially different apparatus as set forth in the previous office action.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: '19' and '20'. The drawings are also objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in

Art Unit: 3724

the claims. Therefore, the fastener and receptacles set forth in claim 17 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

4. Claims 1-6, 10-11, 14-15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by McMahon et al. (US 4,640,165).

McMahon discloses all the recited elements of the invention including:

- a) a knife roller (e.g., 10);
- b) a cooperating anvil roller having an anvil (e.g., 20);
- c) at least one knife carrying unit comprising a knife holder formed of a resilient elastomeric material (e.g., 30), at least one shaped slot having a circumferentially extending component (e.g., 32a or 32b has a width extending circumferentially) and at least one shaped cutting knife having at least one radially outwardly presented cutting edge (e.g., 34a or 34b).

Regarding claims 2, 5-6, and 17, col. 2, lines 51-53. Regarding claims 10-11, col. 4, lines 66-67. Regarding claims 14-15, col. 1, lines 5-7. Regarding claim 17, a retention mechanism (e.g., 36, 38, 44, 48).

5. Claims 1 and 11-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Bugnone (US 4,248,117).

Bugnone discloses all the recited elements of the invention including:

- d) a knife roller (e.g., 18);
- e) a cooperating anvil roller having an anvil (e.g., 16);
- f) at least one knife carrying unit comprising a knife holder (e.g., 24), at least one shaped slot having a circumferentially extending component (e.g., 30) and at least one shaped cutting knife having at least one radially outwardly presented cutting edge (e.g., 20).

Art Unit: 3724

Regarding claim 11, col. 1, line 51. Regarding claims 12-13, see Figure 4. Regarding claims 14-15, the web material is not part of the invention. It merely recites the manner in which a claimed apparatus is intended to be employed. Bugnone satisfies all the claimed structural limitations thus, capable of cutting the recited web material.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Von Schrittz, Kapolnek '093, '065, and Lopez Ascaso et al. are cited to show related devices.
